If convenient, persons requiring Trusses should call at our establishment, where they can have a suitable Truss carefully fitted by a competent and experienced person familiar with the anatomy of hernia. When a call in person is impracticable, a careful description should be sent, stating whether the rupture is on the right or left side; also the measure around the person, two inches below the top of the hip bone. If the rupture is at the navel, the measure should be around the body at the navel. N. B.—Ladies attended by those of their own sex.

#### PREFACE.

In presenting to our patrons and the general public this edition of the Waltham City Directory - No. 10 of the regular series - we would express the hope that it may meet every reasonable expectation. It is scarcely necessary to state that the difficulties and expenses attending the compilation of such a work are very great, and not to be appreciated by any one unfamiliar with the business. The Directory business, like every other, is peculiar to itself.

It will be our constant and earnest endeavor, to give to our patrons, and the general public a book that shall be a credit to us and an indispensable benefit to them. No facility which experience can suggest or money may procure will be spared. We trust and shall expect that the citizens of this beautiful city will give us their most generous support. Let it be remembered that our interests are identical.

Our sincere thanks are extended to all who have aided our canvassers in the collection of information for the present number.

The following synopsis is appended:

Hook & Ladder Co., and Chemical Engine respond to all boxes on First Alarm. On Third Alarm from boxes 28, 35, 36 and 37, Hose 1 will move up to Central Station

#### INSTRUCTIONT TO KEY-HLODERS.

Upon the discovery of fire, go to the nearest box, open the same, and pull the hook down once only, then let go; listen, if the gong in the box strikes; if not, pull again. If you fail the second time, go to the next nearest box, and do the same.

Remain at the box. if possible, after giving an alarm, to direct the firemen to the fire. Do not give an alarm for a fire seen at a distance.

Be sure the box is closed before leaving it.

If you remove from your house or place of business, return the key to the Chief Engineer.

Key-holders will bear in mind that their key will be "trapped" when used, and will be returned to them by an Engineer

Citizens are earnestly requested to keep themselves informed as to the location of keys to signal boxes. Signs over each box will give the desired information.

#### SIGNALS.

I—One blow for test at 6.50 A. M., and 6.50 P. M.

I—One blow for time signal at 12 m.

II—Two blows dismiss companies in waiting, and give notice that companies in service have "made up."

Should an alarm occur from another box before this signal is given, companies answering second will answer on first, and companies answering third will answer on second.

If companies, responding to boxes 35, 36, 37 and 45 on second and third alarms, are wanted without apparatus, one round of the box will follow.

III—Three blows—second alarm.

III—III—Three blows twice—third alarm.

II-II—II-II—II-II—Twenty-two struck three times at 7.30 A. M., indicates no session of schools in the morning; same signal at 1.05 P. M., indicates no afternoon session.
